PROFILE

I am interested in working as a Full Stack Developer, with the ability to develop both frontend and backend systems. I also have experience deploying systems to the cloud using services such as AWS and Thai Data Cloud, ensuring that systems operate efficiently and reliably. Additionally, I possess strong teamwork, communication skills, and a commitment to learning new technologies to continuously improve system performance.

EXPERIENCE

Backend Developer | Rama 2 Medical Group
(Sep 2023 - Present)

Collected user requirements and designed the admin interface, APIs, and backend for Anyhos using Node.js and Express. Integrated Firebase notifications, payment systems, and external APIs (Krungthai Bank, Chiline, LINE Notify). Designed database structures using Firebase and MongoDB. Enhanced security with JWT tokens and encryption. Managed deployment on AWS, including ELB for the backend and S3 with Route 53 for the frontend. Developed admin functions such as patient management, payment systems, and reporting.

Programmer | Bizpotential co. ltd
(Mar 2022 - Nov 2022)

Developed systems MRTA HR, TSRI HR, CRA_ERP_EDU, MUIC, and SIRIRAJ. Responsible for implementing new features such as email notification systems, Excel data import, transcript generation in Word format, welfare reimbursement and approval systems, as well as grade submission and approval workflows.

EDUCATION

Mittraphon Business Administration
(2012-2016)

- Business Computer

Rajamangala University of Technology Krungthep
(2017-2020)

- Information System
